LM Funding America, Inc. Achieves Over 1,260% Year-Over-Year Revenue Growth to \$3.2 Million and Generates Positive Core EBITDA for the Second Quarter of 2023

Mined 106.6 Bitcoins in the Second Quarter of 2023 at an Average Market Revenue Value of Approximately \$27,900 per Bitcoin

Completed Acquisition of Symbiont.io Assets; Advancing Strategic Relationships to Leverage its Assembly™ Financial Services Blockchain Enterprise Platform

Reports Working Capital of Approximately \$5.5 Million and LM Funding Stockholders' Equity of \$39.9 Million (\$2.72 per share) as of June 30, 2023

Conference Call to Be Held Today at 11:00 am ET

TAMPA, FL, August [14], 2023—LM Funding America, Inc. (NASDAQ: LMFA) ("LM Funding" or the "Company"), a cryptocurrency mining and technology-based specialty finance company, today provided a business update and reported financial results for the quarter ended June 30, 2023.

Operational Highlights

- Approximately 5,230 Bitcoin mining machines in operation at hosting sites as of June 30, 2023.
- Mined 106.6 Bitcoin in Q2 2023, valued at approximately \$3.0 million based on the \$27,800 average price of Bitcoin during the quarter.
- Approximately 5,950 Bitcoin mining machines operating as of August 14, 2023 providing approximately 615 PH/s of mining capacity.
- Net loss was approximately \$4.5 million; however, the Company achieved Core EBITDA (as defined below) of \$1.0 million, which excludes approximately \$6.6 million of non-cash expenses.

Bruce Rodgers, Chairman and CEO of LM Funding, commented, "Once again, we made major strides in our transition towards Bitcoin mining as we mined 106.6 Bitcoin during the quarter ended June 30, 2023, a sequential increase of 16% compared to 91.7 Bitcoin mined in the first quarter of 2023. Our goal is to continue to acquire and energize more energy-efficient mining machines as we approach the next Bitcoin halving, anticipated to occur sometime in 2024. As we expand our mining capacity by adding more mining machines, we anticipate an increase in the number of Bitcoins that we will be able to mine. In addition, the Company has installed Braiins OS+ software on 360 of its mining machines, which is expected to increase mining machine hashrate by as much as 25%. Furthermore, machines operating Braiins OS+ software may mine with any pool or mine with Braiins pool and pay no pool fees to Braiins pool."

"An important highlight of the recent quarter was our successful \$2.6 million 'stalking horse' bid, through which we acquired the assets of Symbiont.io, Inc., including its flagship product, the Assembly™ financial services blockchain enterprise platform. This strategic acquisition has put us in position to leverage these assets with potential partners to

deploy the Assembly™ platform within financial institutions for issuing, tracking, and managing financial instruments like data, loans, and securities. At the same time, we are pursuing other potential use cases for the Symbiont assets and the Assembly™ platform," Mr. Rodgers concluded.

Richard Russell, Chief Financial Officer of LM Funding, further noted, "Beyond our year-over-year quarterly revenue growth, we experienced strong sequential quarterly revenue growth of more than 38% compared to Q1 2023 and achieved approximately \$1.0 million of Core EBITDA. We have also maintained a solid balance sheet. As of June 30, 2023, our cash reserves were approximately \$1.8 million, along with roughly 79 Bitcoins, each valued at \$25,300, bringing their total value to \$2.0 million. Our working capital stood at \$5.5 million as of June 30, 2023, and the equity of LM Funding shareholders was \$39.9 million, or \$2.72 per share. Given this financial position, we remain highly encouraged by the financial outlook for the business and look forward to working to drive returns for our shareholders."

Financial Highlights

- Total revenue for the quarter ended June 30, 2023, was approximately \$3.2 million, an increase of \$3.0 million, or more than 1,260%, from \$0.2 million for the 2022 second quarter. The increase was primarily due to digital mining revenue of \$3.0 million in connection with the commencement of our Bitcoin mining operations in September 2022 compared to no digital mining revenue in the same period last year.
- Net loss attributable to LM Funding shareholders for the second quarter ended June 30, 2023, was approximately \$4.5 million, which included a \$3.7 million non-cash, unrealized loss on investment and equity securities, compared to net income of approximately \$2.8 million for the second quarter of 2022, which included a \$12.2 million unrealized gain on investment and equity securities.
- Core EBITDA for the quarter ended June 30, 2023, improved to approximately \$1.0 million, compared to Core EBITDA loss of \$2.0 million in the 2022 comparable quarter, primarily due to our Bitcoin mining operations. Core EBITDA is a non-GAAP financial measure, and a reconciliation of Core EBITDA to net loss is set forth below in this press release.
- Cash of approximately \$1.8 million, digital assets of \$2.0 million, and working capital of \$5.5 million as of June 30, 2023.
- Total LM Funding stockholders' equity of approximately \$39.9 million and net equity per share of \$2.72 as of June 30, 2023. (Calculated as LMFA stockholders' equity divided by approximately 14,651,000 shares outstanding as of June 30, 2023)

NON-GAAP FINANCIAL INFORMATION (unaudited)

Our reported results are presented in accordance with U.S. generally accepted accounting principles ("GAAP"). We also disclose Earnings before Interest, Tax, Depreciation and Amortization ("EBITDA") and Core Earnings before Interest, Tax, Depreciation and Amortization ("Core EBITDA") which adjusts for unrealized loss on investment and equity securities, unrealized gain on convertible debt securities and stock compensation expense and option expense, both of which are non-GAAP financial measures. We believe these non-GAAP financial measures are useful to investors because they are widely accepted industry measures used by analysts and investors to compare the operating performance of Bitcoin miners.

The following tables reconcile net loss, which we believe is the most comparable GAAP measure, to EBITDA and Core EBITDA:
